Welcome to the DISCstyles™ Online Report

INTRODUCTION

DISC is a simple, practical, easy to remember and universally applicable model. It focuses on individual patterns of external, observable behaviors and measures the intensity of characteristics using scales of directness and openness for each of the four styles: **Dominance, Influence, Steadiness, and Conscientious.**

Using the DISC model, it is easy to identify and understand our own style, recognize and cognitively adapt to different styles, and develop a process to communicate more effectively with others.

HOW TO USE THIS REPORT

The DISC report is divided into 3 parts introducing the DISC model, helping you understand your own style, and identifying ways that you can apply your style strengths or modify your style weaknesses in order to meet the needs of others.

- **Part I** focuses on understanding each of the DISC styles and identifying characteristics, including the tendencies of each behavioral style
- **Part II** is about understanding yourself and will reveal information about the tendencies that make you unique
- **Part III** examines and explores adaptability and offers actionable recommendations for you and others who interact with you

With this personalized and comprehensive report, DISC gives you tools to help you become a better you - to develop and use more of your natural strengths while recognizing, improving upon, and modifying your limitations. Then, because we can easily see and hear these behaviors, we can quickly and accurately “read” other people and use our knowledge to enhance communication and grow our relationships.

Please Note: Any behavioral descriptions mentioned in this report are only **tendencies** for your style group and may or may not specifically apply to you personally.

Part I Understanding DISC

BEHAVIORAL STYLES

Historical and contemporary research reveal more than a dozen various models of our behavioral differences, but many share one common thread: the grouping of behavior into **four basic categories**.

The DISC styles are **Dominance, Influence, Steadiness, and Conscientious**. There is no “best” style. Each style has its unique strengths and opportunities for continuing improvement and growth.

The DISCstyles™ assessment examines external and easily observable behaviors and measures tendencies using scales of **directness** and **openness** that each style exhibits.

Part II Understanding Yourself

General Characteristics

The narration below serves as a general overview of your behavioral tendencies. It sets the stage for the report which follows, and provides a framework for understanding and reflecting on your results. We've occasionally provided some coaching ideas so that you can leverage your strengths whenever possible to maximize your personal success.

David, the responses you gave indicate that you tend to be unselfish and sensitive to the needs of others. This is a rare type of generosity that comes with no strings attached, hidden agendas, or ulterior motives. People who score like you get a genuine "rush" when they are helping others. That's the up-side. The flipside is that you may need to monitor yourself closely to make sure you are not spreading yourself too thin in your efforts to please everybody.

You show the ability to meet new people easily and confidently. Some individuals are reticent about meeting others, but you have a warmth and comfort to your style that makes new acquaintanceships easy for you. Your inherent optimism also helps exude a personal confidence without coming off as arrogant. It's a rare gift to show confidence while keeping your ego in check, and others are likely to welcome this style.

With regard to decision making, you tend to listen carefully to alternatives before making a judgment. The decisions you tend to make are not knee-jerk or crisis reactions, but rather thoughtful deliberations taken in a manner that considers the full scope of outcomes. This doesn't mean that all of your decisions are necessarily correct, just that they are informed.

Your response pattern to the instrument indicates that you have an empathetic listening style. As you know, this is a rare gift. Some listening skills can be taught, but the inherent, sincere listening that you demonstrate is something innate.

You score like those who prefer to establish long-term relationships, rather than brief, superficial ones. This perhaps comes from your preference toward stability in your lifespace, and longer-term relationships may bring that stability. Friendships and acquaintanceships you have made in the past are important to you, even now.

You tend to have a long fuse and seldom become visibly angry or agitated. You may harbor internal anger, but you tend not to vocalize it to those involved, instead perhaps "venting" to others not involved in the project. Overall, you tend not to seek direct confrontation about what is making you upset, which is a good thing as long as you don't let such conflicts boil to the surface.

Your responses indicate that you tend not to force your own ideas on others with edicts, but rather by offering carefully considered suggestions. This can be a key point of success in a variety of areas. It helps build both rapport and credibility with others and is a strength that you can affirm in a genuine way. The combination of your listening skills, people skills, and innate sincerity allow you to influence others and thus affect the results.

You have the ability to persuade others, not with hype, but rather with warmth, sincerity, and understanding. These are perhaps considered "soft sell" tools, but they can make a big impact. This skill comes from the merging of your "people skills," along with the fact that you tend to be more modest when dealing with people.

Style Overview

DISC describes you based on your observable behavior which can provide insights for others regarding your communication preferences and how you will likely interact with and respond to them.

Through this report you have an opportunity to discover (observe and evaluate) your behavioral responses in various environments. You can explore your reactions to a variety of situations and contexts, including the actions and reactions of others, to determine the most effective communication strategy or course of action.

Your Behavioral Style: Coach

Coaches are adept at solving "people problems." They are seen as warm, empathetic and insightful. They like to form extended personal relationships and often develop a reputation for unobtrusive, contributory efforts when working with others. They can become too lenient with marginal contributors and tend to be too mild when issuing corrections, directions and expectations.

Below are some key behavioral insights to keep in mind and share with others to strengthen your relationships.

- **Emotional characteristic:** Wants to be seen as warm and open by others.
- **Goals:** Building personal connections and positive feelings.
- **How others are valued:** Favorable recognition of others; finds the basic decency in them.
- **Influences group:** Through personal relationships and being open to others' ideas, problems and needs.
- **Value to the organization:** Will bring stability to group efforts with predictable actions and will possess good listening skills.
- **Cautions:** Can become too tolerant and may avoid needed direct confrontations.
- **Under Pressure:** Can become too accommodating, trusting and sharing too much with others.
- **Fears:** Having to pressure others or being seen or blamed as the source of pain or problems by others.

WORD SKETCH - Adapted Style

DISC is an observable “needs-motivated” instrument based on the idea that emotions and behaviors are neither “good” nor “bad.” Rather, behaviors reveal the needs that motivate that behavior. Therefore, once we can accurately observe one’s actions, it is easier to “read” and anticipate their likely motivators and needs.

This chart shows your ADAPTED DISC Graph as a “Word Sketch.” Use it with examples to describe why you do what you do and what’s important to you when it comes to (D)ominance of Problems, (I)nfluence of People, (S)teadiness of Pace, or (C)onscientiousness of Procedures. Share more about the specific needs that drive you in each area of FOCUS. If your DISC intensity scores at levels 1 and 2, your emotions and needs are the opposite of those at Levels 5 and 6 in that area.

DISCstyles eGraphs for David Dowdy

Your Adapted Style indicates you tend to use the behavioral traits of the SC style(s) in your selected Work focus. Your Natural Style indicates that you naturally tend to use the behavioral traits of the ISC style(s).

Your Adapted Style is your graph displayed on the left. It is **your perception of the behavioral tendencies you think you should use in your selected focus** (work, social or family). This graph may change when you change roles or situations. The graph on the right is your Natural Style **and indicates the intensity of your instinctive behaviors and motivators**. It is often a better indicator of the “real you” and your “knee jerk”, instinctive behaviors. This is how you act when you feel comfortable in your home environment and are not attempting to impress. It is also what shows up in stressful situations. This graph tends to be fairly consistent, even in different environments.

If the bars are similar, it means that you tend to use your same natural behaviors in either environment. If your Adapted Style is different from your Natural Style, this may cause stress if over a long period of time. You are then using behaviors that are not as comfortable or natural for you.

The four-digit numbers (under the graphs) represent your segment numbers in DISC order and dictate the adjectives highlighted on the Word Sketch pages.

The higher or lower each D, I, S, C point is on your graph, the greater or lesser your behavior impacts your results at work and with others around you. Once aware, you can adapt your style to be more effective. Can you change? Of course! You do it every day depending on your situations. However, permanent behavioral change comes only with awareness and practice.

Behavioral Pattern View

The BPV has eight behavioral zones. Each zone identifies a different combination of behavioral traits. The peripheral descriptors describe how others typically see individuals with your style. Plots on the outer edges of the BPV identify that one factor (DISC) of your style will dominate the other three. As you move towards the center of the BPV, two and eventually three traits combine to moderate the intensity of your style descriptors within a specific behavioral zone. +The plus sign indicates that the preceding style score is higher, moving you closer to that style zone (i.e. CD+S: The D score is stronger than in CDS so it plots closer to the D behavioral zone).

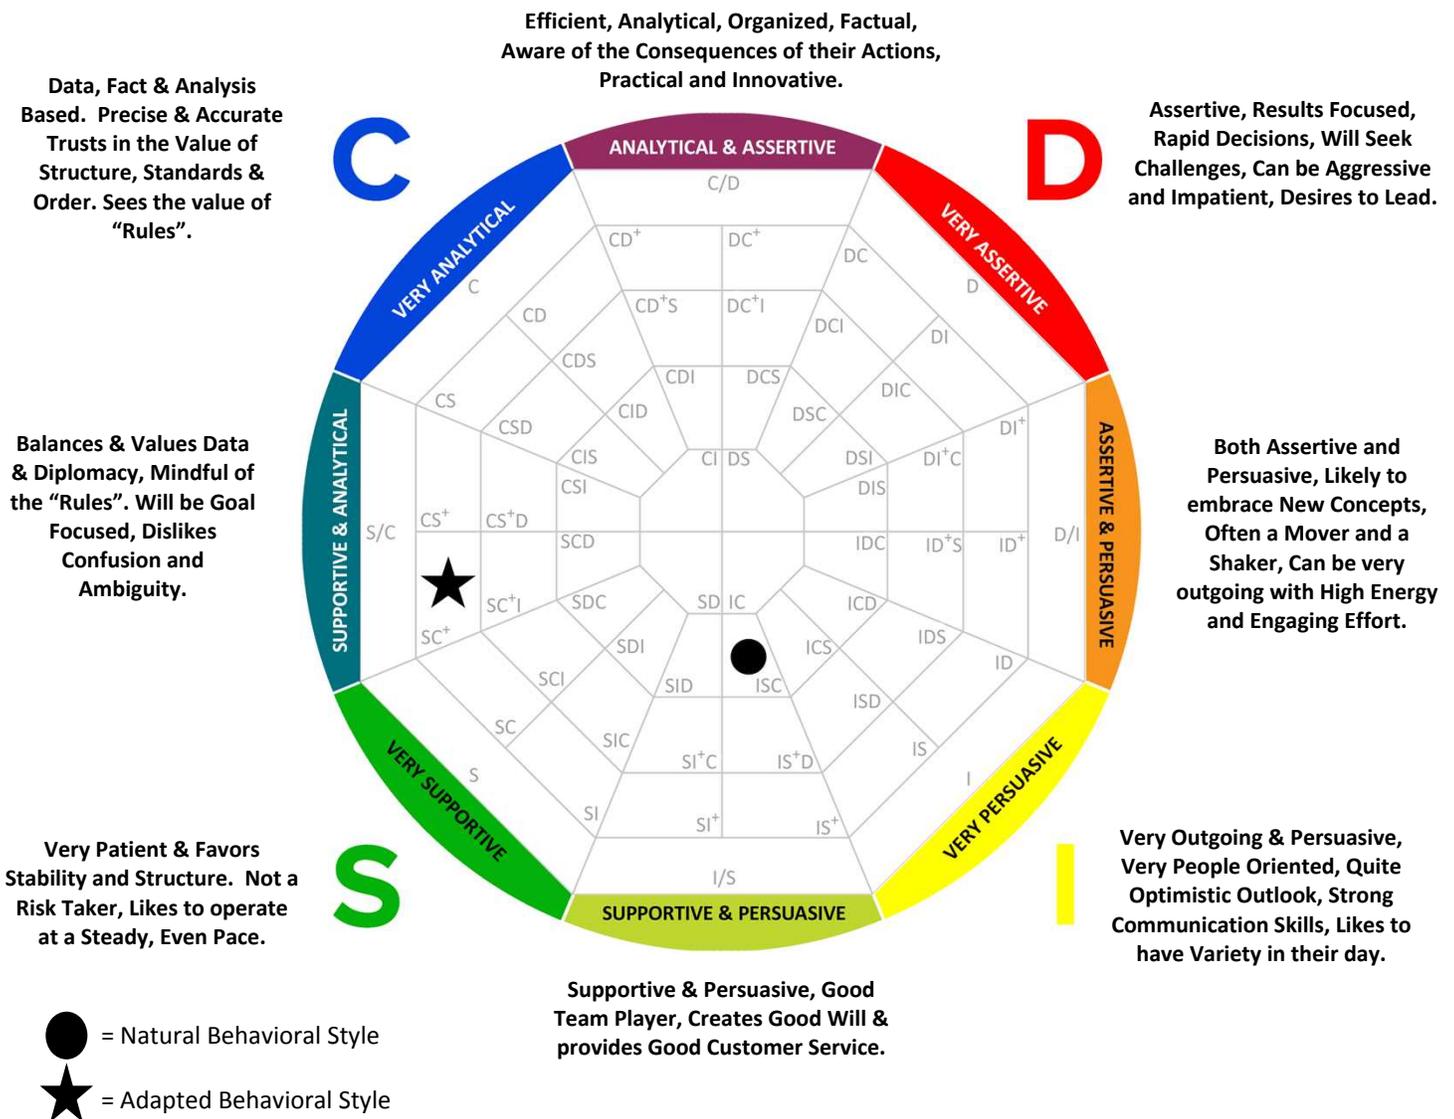

THE SCORING LEGEND

D = Dominance: How you deal with Problems and Challenges

I = Influence: How you deal with People and Contacts

S = Steadiness: How you deal with Pace and Consistency

C = Conscientious/Compliance/Structure: How you deal with Procedure and Constraints

Your Motivators: Wants and Needs

Motivation is the enthusiasm or willingness to do something. Everybody is motivated; however, all people are motivated for their own reasons, not somebody else's. Simply, people are motivated by what they want.

Our behaviors are also driven by our needs. Each style has different needs. If one person is stressed, they may need quiet time alone; another may need social time around a lot of people. Each has different ways to meet their needs. The more fully our needs are met, the easier it is to perform at an optimal level.

Choose the two most important wants and the two most important needs and transfer them to the Summary of Your Style page.

You Tend to Be Motivated By:

- Flexibility to circulate and talk with a variety of people.
- Identification with the organization, team, and others with whom a spirit of work responsibility has been established.
- A work culture that is supportive of family activities and commitments.
- Evidence that a new process has been successful in similar applications.
- Acceptance as a positive and supportive member of the organization and team.
- A supervisor, manager, or board who practices a democratic leadership process.
- Projects and assignments that provide interpersonal contact, and an opportunity to help both internal and external stakeholders.

People With Patterns Like You Tend to Need:

- To learn to say "no" more often in order to avoid spreading yourself too thin.
- To get better control of files and record keeping.
- More direction toward work tasks, and less focus on chatting and socializing.
- Encouragement to keep the positive spirit and optimism when the pressure is on.
- To be kept in the information loop regarding projects and initiatives within the organization.
- A sense of belonging to the team or organization as a whole.
- Increased urgency in decision making.

What You Bring to the Organization

This page provides useful insights for a job or as you work together on a team or family project. These are the talents and tendencies you bring. When used in environments that you are most effective in, you are likely to be self-motivated to accomplish great things. It is possible that you may not always be in an environment that allows you to be your best. We recommend you speak with your leader to see what can be incorporated into your current environment to help maintain your motivation. Check the two most important strengths, the two most important work style tendencies and the two most important environmental factors and transfer them to the Summary of Your Style page.

Your Strengths:

- You are a good listener.
- You are able to negotiate conflicts into win-win situations.
- You are very people-oriented and, as a result, are able to talk with new people very easily in small groups or in large audiences.
- You work hard to achieve the team's goals and objectives.
- You bring a high "sincerity factor" to the team climate.
- You possess a positive sense of humor and never make jokes at the expense of others.
- You are able to build positive relationships with internal and external stakeholders.

Your Work Style Tendencies:

- You are perceived by others on the team as a good listener.
- On the job, you tend to say "yes" more often than "no," when asked to help out with a colleague's project or problem.
- On the job, you have a strong need to be patient, polite, and create an environment of good-will for internal and external stakeholders.
- You are optimistic and motivated to be an excellent team player, able to defer your ego when working with others who may prefer having more control of the situation.
- You tend to be an excellent "teacher" to peers on the team, at all levels of the organization.
- At work, you tend to have a "long fuse," and are not easily angered, although you may take some of the anger home to vent.
- You meet new people easily and prefer networking with others rather than working in solitary conditions.

You Tend to Be Most Effective In Environments That Provide:

- Clear responsibility and lines of authority to avoid confusion or overlapping initiatives.
- Support and appreciation of your individual efforts.

- A favorable working climate containing positive attitudes and optimistic spirit.

The I Style

Under Stress - Perceptions, Behavior and Needs for the I

Stress is unavoidable. The perceptions of our behavior may have a significant impact on our effectiveness - both in how we perceive ourselves and how others perceive us. The way we behave under stress can create a perception that is not what we intend. The descriptions below of perceptions by others may seem somewhat extreme at times (especially if our behavior is an over-extended strength that becomes a weakness or limitation). As you understand these perceptions more clearly, you are able to modify your behavior to maximize your own effectiveness and ensure that others see you as you intend.

Potential Self Perception:

- Accepting of others
- Good coach / counselor
- A stabilizing presence
- Modest

Under Stress, May be Perceived by Others:

- Doesn't take a stand
- Uncertain
- Doesn't meet deadlines
- Doesn't accept responsibility

Under Stress You Need:

- Action and interaction
- A quick pace for stimulation and excitement
- Prestige

Your Typical Behaviors in Conflict:

- If a conflict persists or your anger increases, you are likely to lash out with a strong verbal attack on the other person. This may have a startling effect on others since it is so unlike your normal behavior.
- Your anger is generally a response to a personal attack or, possibly, the failure of someone to support you when you were really counting on that person's support. Of course you may interpret a comment intended to refer to a task-related problem as a personal attack, especially if it concerns your contribution to the problem.
- You are quite uncomfortable with conflict, aggression and anger. You do whatever you can do to avoid them. If possible, you may physically avoid an environment filled with conflict or anger. If that is not possible, you will probably seek to use your natural humor and story-telling ability to reduce the level of tension. If neither approach works, you may attempt to ignore the conflict. Given your strong focus on relationships, however, this tactic is rarely successful.

Strategies to Reduce Conflict and Increase Harmony:

- Recognize that you can never resolve a conflict by avoiding it. Risk damaging a relationship or losing someone's approval by stating your feelings and clarifying your expectations. Be sure, of course, to listen attentively to the responses of others.
- Take time to clarify the commitments and expectations of others. Do not make any assumptions about what others will do. Always get a specific commitment.
- Avoid giving others a false impression of the level of support you will give them. When promising your support, make clear precisely what it is that you will do.

Potential Areas for Improvement

Everyone has struggles, limitations, or weaknesses. Oftentimes, it's simply an overextension of our strengths which may become a weakness. For example, a High D's directness may be a strength in certain environments, but when overextended they may tend to become bossy.

As you consider ways to continue to improve to be a better communicator, we recommend you focus on no more than two at a time, practice and strengthen them, and then choose another area to focus on and improve.

Check the two most important areas you are committed to improve upon and transfer them to the Summary of Your Style page.

Potential Areas for Improvement:

- You may show less emphasis on productivity and more emphasis on the "people side" of a project.
- You may need some coaching in time management; for instance, in setting more ambitious deadlines.
- You may be a bit of a grudge-holder toward those who offer criticism.
- You may be rather indirect in providing instructions, because you don't want to impose your will on others.
- You may have difficulty with quick decision making because of your need to consider the "people side" of all issues.
- You may hesitate to correct or discipline those who report to you, for fear of offending someone.
- You may tend to take constructive criticism personally, possibly losing focus as to how it relates to the task.

12 Behavioral Tendencies – Details & Graphs

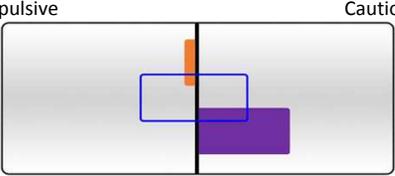

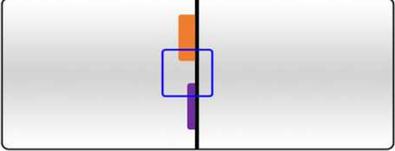

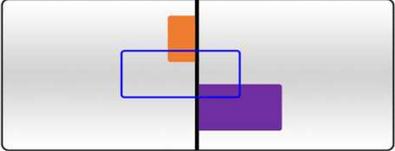

For each of the 12, you will see a graph and personalized statement for your Natural and Adapted style. These scores and statements reveal which of your style combinations are most observable and describe how you express that tendency based on your DISC blend.

Interpretation Notes:

- Frequency Observed:** The behavioral tendencies are presented in the order from Most Frequently Observed to Least Frequently Observed.
 - HI – Clearly observed in most situations, seen more often
 - HM – Frequently observed in many situations
 - MOD – May or may not be observed depending on the situation
 - LM – Sometimes observed in some situations
 - LOW – Absence of the behavior in most situations
- Direction of your score** – As the graph moves to the right or left, it shows how you will likely express the behavior. If the graphs are near the center, the result is a balancing behavioral effect that will depend on the situation.
- General Population Comparison** – The blue box represents the general population in this behavioral tendency. Approximately 68% of people score in this range.

		Situational
<h3>Building Rapport</h3> <p>Natural (HI): You are very social, focused on interacting with others to build relationships and grow your network. You are more likely to focus on making connections, rather than accomplishing a goal or completing a task. Don't forget that sometimes there are things to be done.</p> <p>Adapted (HM): You are somewhat social and more likely to focus on building relationship and making connections, rather than accomplishing a goal or completing a task. Don't forget that sometimes there are things to be done.</p>		
<h3>Change Resistance</h3> <p>Natural (HI): You are reluctant to embrace change unless you can prepare for it and understand all expectations and reasons for the needed adjustments. You are likely to respond/interact in change by building understanding first, and then planning how to successfully navigate what may come. Summary of David Dowdy's Style

Communication is a two-way process. Encourage others to complete their own DISCstyles Online Assessment and then share the Summary Sheet with each other. By discussing preferences, needs and wants of the people you work with, socialize with and live with, you can enhance these relationships and turn what might have been a stressful relationship into a more effective one just by understanding and applying the DISCstyles information. Complete the worksheet below from the previous pages of this report.

PART III UNDERSTANDING OTHERS AND ADAPTABILITY

Understanding your own behavioral style is just the first step to enhancing relationships. To really begin to use the power of behavioral styles, you also need to know how to apply the information to other people and in other situations. Good relationships can get better and challenging relationships may become good.

People want to be treated according to their behavioral style, not yours.

People generally make the mistake of assuming that others interact and think the same way they do, and many of us grew up believing in The Golden Rule: treating others the way you would like to be treated. Instead, we encourage another practical rule to live by - what Dr. Tony Alessandra calls **The Platinum Rule®: to treat others the way THEY want to be treated**. This practice requires strategic adjustment made on a case-by-case basis, and adjusting your own behavior to make people feel more at ease with you and the situation is known as **Adaptability**.

It is important to remember that adapting our styles is not always easy! It may take some time, feel very difficult, or seem especially foreign in certain situations. Give it time, practice, patience and diligence and you will see relationship benefits.

What is Adaptability?

Adaptability is based on two elements: **Flexibility and Aptitude**. **Flexibility** is your **Willingness** and **Aptitude** is your **Capability** to adjust your approach or strategy based on the particular needs of the situation or relationship at a particular time. It's something you must **cognitively choose to apply** to yourself (to your patterns, attitudes and habits), not expect from others.

We practice adaptability each time we slow down for a C or S style; or when we move a bit faster for the D or I style. It also occurs when the D or C styles take the time to build the relationship with an S or I style, or when the I or S style focuses on facts or gets right to the point with D or C styles.

Adaptability does not mean an “imitation” of the other person’s style. It does mean adjusting your openness, directness, pace, and priority in the direction of the other person’s preference, while maintaining your own identity. Adaptable people know how to negotiate relationships in a way that allows everyone to win.

Your adaptability level influences how others judge their relationship with you. Raising your adaptability will increase trust and credibility; if you lower your adaptability, trust and credibility will decrease. Being more adaptable enables you to interact more productively with difficult people and helps you to avoid or manage tense situations.

Important Considerations:

- Adaptability is important to **all** successful relationships.
- No one style is naturally more adaptable than another.
- Adaptability is a choice:
 - You can choose to be adaptable with one person, and not so with others.
 - You can choose to be quite adaptable with one person today and less adaptable with that same individual tomorrow.
- People often adopt a different style in their professional lives than they do in their social and personal lives.
 - We tend to be more adaptable at work and with people we know less.
 - We tend to be less adaptable at home and with people we know better.

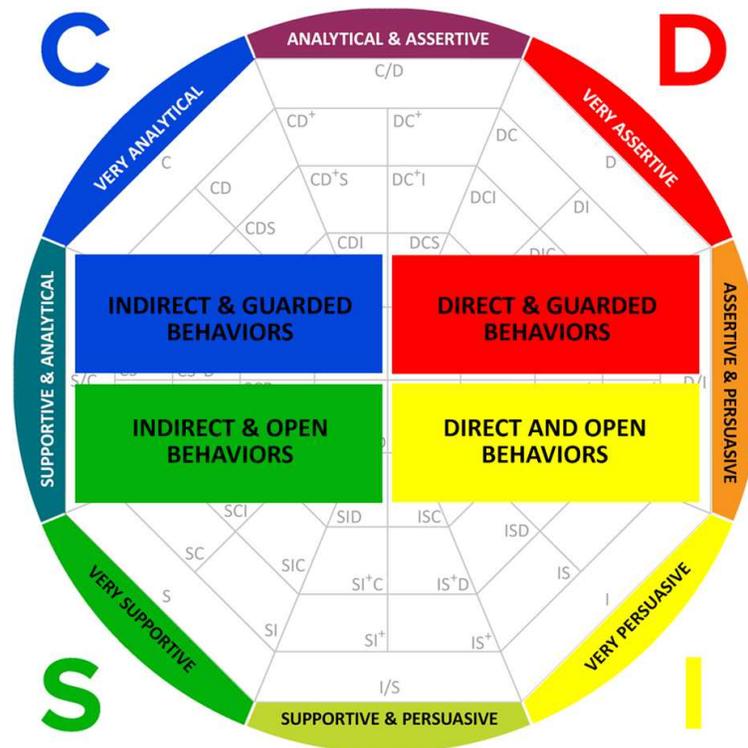

Words of Advice:

Adaptability at its extreme could appear wishy-washy and two-faced. A person who maintains high adaptability in all situations may not be able to avoid stress and inefficiency. There is also the danger of developing tension from the stress of behaving in a “foreign” style. Usually, this is temporary and may be worth it if you gain rapport with others. At the other end of the continuum, no adaptability would cause others to view someone as rigid and uncompromising because they insist on behaving according to their own natural pace and priority.

Recognizing another person's Behavioral Style

2 Power Questions:

1. Are they **DIRECT** or **INDIRECT** in their communications?
(Directness is the 1st predictor of Style. Direct plots on the right, Indirect on the Left).
2. Are they **GUARDED** or **OPEN** in their communications?
(Openness is the 2nd predictor of Style. Open plots on the Bottom, Guarded on the Top).

When we integrate both the natural tendency to be either **DIRECT** or **INDIRECT** with the natural tendency to be either **GUARDED** or **OPEN**, it forms the foundation and the basis for plotting each of the four different behavioral styles:

D = Individuals who typically exhibit *direct & guarded behaviors* define the **Dominant Style**.

I = Individuals who exhibit *direct & open behaviors* define the **Influence Style**.

S = Individuals who exhibit *indirect & open behaviors* define the **Steadiness Style**.

C = Individuals who exhibit *indirect & guarded behaviors* define the **Conscientious Style**.

The behavioral intensity of directness or indirectness and being open or guarded is shown in the quadrant you plot. The plots towards the edge of the BPV reflect **MORE INTENSITY** and those plotting closer to the center reflect **MODERATE INTENSITY** of both characteristics.

Application Activities

Adaptability Practice

Spend some time with people at home and at work that you know and trust who are different styles than you. Explore ways to communicate more effectively with them. Ask for support and feedback as you try new ways to communicate. Remember- tell them this is a skill you are building so they aren't surprised when you are behaving differently and can provide helpful feedback!

- **Practice Identifying their style based** on observable behavior
- **Practice Modifying your Directness and Openness** in conversation with them
- **Practice Modifying your Pace and Priority**
- **Ask for feedback** on your effectiveness in communicating with them
- **Take some time to reflect on your experience** and what worked or didn't work for you and for them
- **Consider** what you should repeat, and what you need to modify further to communicate as effectively as possible.

As you begin feeling more comfortable with adaptability and the needs of each style, try it with others!

Adaptability Activity

Select a relationship in which things have not gone as smoothly as you would like. Make a commitment to take the time to gain an understanding of the other person's behavioral style and take a few steps to adapt your behavior to improve the relationship.

- 1** Identify the behavioral style of the other person using the 2 Power Questions:
 - Are they DIRECT or INDIRECT in their communication?
 - Are they GUARDED or OPEN in their communication?
- 2** Brush up on their style and look at ways to adapt your Directness and Openness when working with them.
- 3** To further understand the tension that may exist in the relationship, notice the difference in preference in pace and priority and modify accordingly.
- 4** Practice approaching them in the way you think **THEY want to be treated**. Remember, it may feel uncomfortable at first, but with practice and dedication to adapting, you will be amazed at the difference.

Tension Among the Styles Exercise

Even if you have the highest regard toward a person, tension can exist in a relationship where styles are different. If this is behavior related, applying The Platinum Rule® - Treat others the way THEY want to be treated – may be helpful. Complete this exercise to gain insights on how to improve tense relationships. If you feel comfortable, you may discuss with the other person things you can do to ease the tension.
